Maimouna Ndiaye

Junior Full-Stack Software Engineer

Dallas, TX • maymounandiaye55@gmail.com • GitHub • Portfolio • LinkedIn

PROFESSIONAL SUMMARY

Junior Full-Stack Software Engineer with hands-on experience building scalable web and mobile applications using React, Angular, Node.js, NestJS, and Laravel, and integrating with a Spring Boot (Java) backend in my current role. Skilled in secure REST APIs, JWT authentication, RBAC, and database-driven applications within Agile teams. Completed Springboard's Software Development Career Track through Amazon Career Choice, working one-on-one with an industry mentor to build production-style projects.

TECHNICAL SKILLS

Front-End: React.js, JavaScript (ES6+), TypeScript, jQuery, HTML5, CSS3, Angular, TailwindCSS, Bootstrap, Responsive Design

Back-End: Node.js, NestJS, Laravel, Java (Spring Boot), REST API design & integration, JWT Authentication, RBAC

Databases: MySQL, PostgreSQL, SQL, Firebase, SQL Server

Tools & Practices: Git, GitHub, GitLab, Docker, Swagger, Postman, Jira, Trello, CI/CD, Agile/Scrum, MVC, SDLC

PROJECTS

Space Travel Web Application (Springboard Capstone) — *React.js, React Router, Context API*

- Built a production-style single-page application featuring complete CRUD functionality for spacecraft and planetary transfer management.
- Implemented dynamic routing, reusable components, Context API state management, form validation, and integration with a mock API backed by local storage.
- Applied modern React development practices, responsive design, and clean code principles under mentor code review.

Jeopardy Trivia Game — *JavaScript, jQuery, HTML, CSS*

- Built an interactive trivia game using Axios to fetch categories and clues from a live API, with score logic and dynamic DOM updates across rounds.
- Focused on responsive layout, cross-browser compatibility, and smooth UI interactions.

Inter-Network Money Transfer System — *Node.js, NestJS, MySQL*

- Designed and developed secure transaction management services for cross-network fund transfers.
- Built REST endpoints and integrated MySQL for data integrity, implementing backend business logic consumed by front-end clients.

Course Management Platform — *Angular, Laravel, Ionic, TailwindCSS*

- Developed a full-stack web and mobile application with course management, authentication, and responsive interfaces for students and instructors.
- Integrated database-driven functionality for reliable data management.

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer | *Velocity Money* | Jul 2026 – Present | Part-time, Remote

- Develop and integrate a React-based back-office admin panel with a Spring Boot (Java) backend for a mobile money platform, implementing JWT authentication flows, dashboard analytics, and transaction management features.
- Coordinate across Mobile (Flutter) and Backend teams to ensure API contract consistency, and author technical documentation covering system architecture, API integrations, and deployment workflows.
- Collaborate on Mobile Money partner API integrations, including authentication flows, and validate functionality through testing ahead of production releases.
- Work with PostgreSQL alongside MySQL-based services, and use Docker and Swagger as part of the development and API documentation workflow.

Fulfillment Associate | *Amazon* | Oct 2024 – Present | Dallas, TX

- Maintain high accuracy and quality standards in a fast-paced operational environment while continuing to develop my technical skills and pursue software engineering opportunities.

Junior Backend Developer | *Kwiku SAS* | Jan 2024 – Dec 2024 | Full-time, Remote — Dakar Region, Senegal

- Developed backend APIs using NestJS to support integration with the team's Flutter mobile application. Documented and tested API endpoints using Swagger and Postman.
- Implemented Firebase authentication with OTP verification and integrated Mobile Money payment partners, including Orange Money and Wave.
- Tracked development work in Jira and GitHub and collaborated daily with the team through Slack.

Junior Backend Developer | *Velocity Money* | Jan 2024 – Jun 2024 | Part-time, Remote — Dakar

- Designed, developed, and maintained RESTful APIs with Node.js and NestJS following MVC architecture, and implemented JWT authentication with role-based access control (RBAC).
- Integrated relational databases with JSON schema validation, and collaborated in Agile/Scrum using GitLab for version control and sprint tracking, coordinating with the team via Discord across the full SDLC.

EDUCATION

Bachelor's Degree in Computer Science (2 years) — ESIA, 2022

Associate Degree – Business IT, With Honors — ISI Dakar, 2022

CERTIFICATIONS

Software Development Career Track — Springboard (Amazon Career Choice), Jul 2026

210+ hours of coursework with weekly 1:1 mentoring from an industry software engineer; built and shipped full-stack capstone projects (including the Space Travel Web Application), with mentor-led code reviews, mock technical interviews, and portfolio/job-search preparation. Verified Certificate #189182441.

Web & Mobile Development Certification — Sonatel Academy, 2023

Selected as 1 of 50 developers from a nationwide pool of 16,000+ applicants; completed an intensive 10-month training program (JavaScript, PHP, Laravel, Angular, Ionic) before industry placement

Programming with JavaScript — Meta (Coursera), Jan 2026

Introduction to Front-End Development — Meta (Coursera), Sep 2025
