Maimouna Ndiaye

Full-Stack Software Developer

Dallas, TX • maymounandiaye55@gmail.com • GitHub • Portfolio • LinkedIn

Work Authorization: U.S. Permanent Resident (Green Card) — authorized to work without sponsorship

PROFESSIONAL SUMMARY

Full-Stack Software Developer with hands-on experience designing and building scalable web and mobile applications using React, Angular, Node.js, NestJS, and Laravel. Skilled in developing secure REST APIs, JWT authentication, role-based access control, and database-driven applications within Agile engineering teams. Completed Springboard's Software Development Career Track through Amazon Career Choice, working one-on-one with an industry mentor to build production-style projects and practice modern software engineering workflows. Focused on writing clean, maintainable code and delivering reliable user experiences.

TECHNICAL SKILLS

Front-End: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Angular, TailwindCSS, Bootstrap, Responsive Design

Back-End: Node.js, NestJS, REST API design & integration, Laravel, JWT Authentication, RBAC

Databases: MySQL, PostgreSQL, SQL, Firebase, SQL Server

AI-Assisted Development: Claude, Lovable — daily use for code generation, debugging, documentation, and workflow acceleration

Tools & Practices: Git, GitHub, GitLab, Jira, Trello, CI/CD, Agile/Scrum, MVC, SDLC

PROJECTS

Space Travel Web Application (Springboard Capstone) — *React.js, React Router, Context API*

- Built a production-style single-page application featuring complete CRUD functionality for spacecraft and planetary transfer management.
- Implemented dynamic routing, reusable components, Context API state management, form validation, and REST API integration.
- Applied modern React development practices, responsive design, and clean code principles under mentor code review.

Jeopardy Trivia Game — *JavaScript, HTML, CSS*

- Built an interactive trivia game using Axios to fetch categories and clues from a live API, with score logic and dynamic DOM updates across rounds.
- Focused on responsive layout, cross-browser compatibility, and smooth UI interactions.

Inter-Network Money Transfer System — *Node.js, NestJS, MySQL*

- Designed and developed secure transaction management services for cross-network fund transfers.
- Built REST endpoints and integrated MySQL for data integrity, implementing backend business logic consumed by front-end clients.

Course Management Platform — *Angular, Laravel, Ionic, TailwindCSS*

- Developed a full-stack web and mobile application with course management, authentication, and responsive interfaces for students and instructors.
- Integrated database-driven functionality for reliable data management.

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer | *Velocity Money* | Jul 2026 – Present | Part-time, Remote

- Rejoined the engineering team to support technical continuity across a React web app, NestJS backend, and Flutter mobile app, coordinating closely with Mobile and Backend teams.
- Produce technical documentation covering system architecture, API integrations, deployment workflows, and CI/CD processes to improve team knowledge sharing.
- Collaborate on Mobile Money partner API integrations, including authentication flows, and validate functionality through testing ahead of production releases.
- Work with PostgreSQL alongside MySQL-based services as part of the backend data layer.

Back End Developer | *Kwiku SAS* | Jan 2024 – Dec 2024 | Internship, Remote — Dakar, Senegal

- Developed backend features in NestJS/TypeScript integrated with the team's Flutter app, using Jira/GitHub in an Agile CI/CD workflow, with Firebase authentication.
- Coordinated with the team via Slack and supported application scalability improvements.

Junior Back End Developer | *Velocity Money* | Jan 2024 – Aug 2024 | Part-time, Remote

- Designed and implemented RESTful CRUD APIs following MVC architecture, consumed by Flutter and web front-end clients.
- Implemented JWT authentication and role-based access control (RBAC) for secure user management.
- Collaborated with cross-functional teams throughout the software development lifecycle using GitLab, Trello, and Agile methodologies.

Printing Technician | *Amazon* | Oct 2024 – Present | Dallas, TX

- Operate printing equipment to meet daily production and quality standards, while actively pursuing software development opportunities in parallel.

EDUCATION

Bachelor's Degree in Computer Science (2 years) — ESIA, 2022

Associate Degree – Business IT, With Honors — ISI Dakar, 2022

CERTIFICATIONS

Software Development Career Track — Springboard (Amazon Career Choice), Jul 2026

210+ hours of coursework with weekly 1:1 mentoring from an industry software engineer; built and shipped full-stack capstone projects (including the Space Travel Web Application), with mentor-led code reviews, mock technical interviews, and portfolio/job-search preparation. Verified Certificate #189182441.

Web & Mobile Development Certification — Sonatel Academy, 2023

Selected as 1 of 50 developers from a nationwide pool of 16,000+ applicants; completed an intensive 10-month training program (JavaScript, PHP, Laravel, Angular, Ionic) before industry placement

Programming with JavaScript — Meta (Coursera), Jan 2026

Introduction to Front-End Development — Meta (Coursera), Sep 2025
